

“on-demand” service”

Just Leaks offers on-demand service for mechanical contractors. Because we are a service company, we are well suited to provide prompt service for any type of equipment tie-in. Same day service is usually available.

We often fix
leaks due to
this kind of
installation.

HEAVY

“build to your engineer’s specifications”

Our roof work looks as good as your mechanical work.

Let us tie in your roof penetrations. Our roof work makes your installation look extremely professional and is warranted for 3 years.

Just Leaks has both C39 (Roofing) and B (General) classifications on California State Contractors License (#712805).

This means that we can also cut open the roof and build the equipment curb or supports to your engineer’s specifications for you. We have found this to be helpful to HVAC contractors during the busy season.

Since Just Leaks only does roof repair and equipment installation and is warranted for 3 years, it is in our best interest to use the very best, state of the art materials. We do not use hot asphalt, so there are no kettle fumes to disturb your client.

We can give on-the-spot quotes over the phone to help with your bidding process.

Please visit our website at www.justleaks.com

We accept Visa and MasterCard for your convenience.

Just Leaks is a member of the Better Business Bureau, The National Roofing Contractors Association, The Western States Roofing Contractors Association, The National Federation of Independent Business, The San Jose Chamber of Commerce, and the Santa Clara Chamber of Commerce.

Just Leaks has been ValueStar Certified since February 1999.
